

Climate change and carbon policy statement

This statement supports ISG's stance on sustainability, the environment, procurement and the use of materials, products and components / systems. It also outlines our commitment towards a net zero carbon built environment, specifically aiming to:

- Take a whole-life view of carbon in the projects we deliver.
- Deliver fossil fuel free construction operations, while optimising energy use on sites.
- Support our clients to operate net zero carbon buildings.
- Take a holistic view of sustainability through our delivery, balancing the drive to a low-carbon economy with that of both circular principles and delivering real social value.

We are committed to:

- Targeting net zero carbon in our operations by 2030.
- Developing and introducing an internal carbon fund to be paid into by ISG's business units and implemented from 2024 onwards.
- Utilising money raised through our internal tax fund to invest in the research and development (R&D) of low-carbon technologies and methods of construction.
- Collaborating with our supply chain and innovative organisations to support the uptake of new low-carbon technologies in the construction industry.
- Developing a strategy to measure and reduce embodied carbon through the projects we deliver.
- Creating an aftercare service and app to support our clients in operating their assets in line with the original design intent.
- Developing and delivering carbon literacy training to all ISG employees, thereby working to integrate carbon reduction into the decision-making processes of our workforce.
- Utilising our experience to influence and support our clients in delivering a net zero carbon built environment, striving for earlier engagement in order to maximise the opportunities to reduce embodied, construction and operational carbon.
- Identifying and ensuring compliance with relevant low-carbon planning requirements at national, regional and city level, and influencing industry best practice to ensure we are continually showing leadership and therefore driving revolutionary change.

Responsibilities have been defined for all ISG employees and are contained within the 'Sustainability roles and responsibilities' document, available as part of our management system. All employees and contractors are expected to co-operate with ISG in the implementation of the climate change and carbon policy.

This statement is regularly reviewed to ensure it remains current and appropriate to the purpose and context of the organisation, including the nature, scale and impacts of our activities, products and services.
